The routing engine: results

Test bench of 11 November 2026, on the current version of the engine. 24 real passages, from Breton channels to crossing the Pacific; each computed once with each of the five profiles: 130 routes. Each route was sailed by a simulated boat, then laid on a very detailed map of the coast.

24 / 24

passages brought to port

the Overview quick look leaves the narrow way out of the Gulf of Morbihan to the Offshore profile, which the application suggests

3 s

the largest gap to the promised time, over a 237 h crossing

Canaries → Antigua, the five profiles; 1 min at most on any route

12 s

to compute Lorient → New York, 2,960 miles, with the Standard profile

1.5 s for half of the routes

0.4%

from the best route, on average, with the Standard profile

for a computation 4 times shorter than Racing

What each profile costs, and what it brings

For each passage, we take the fastest of the five profiles' routes and measure how far each profile is from it. The finer the profile, the more headings it tries, the closer its route gets to the best, and the longer its computation.

PROFILE	ROUTES ARRIVED	AVERAGE GAP TO THE BEST ROUTE	COMPUTATION, HALF OF THE ROUTES UNDER	COMPUTATION AT MOST	LORIENT → NEW YORK (2,960 MILES)	HEADINGS TRIED EVERY
Overview fast	23 / 26	1.10 % at most 3.5 %	0.8 s	8.1 s	206 h 03 5.5 s of computation	10°
Offshore open sea	26 / 26	0.68 % at most 1.8 %	1.0 s	9.6 s	204 h 34 7.4 s of computation	8°
Standard balanced	26 / 26	0.43 % at most 1.2 %	1.4 s	15 s	203 h 57 12 s of computation	6°
Coastal coasts	26 / 26	0.29 % at most 1.1 %	2.2 s	29 s	203 h 43 22 s of computation	4°
Racing precise	26 / 26	0.00 % at most 0.1 %	5.4 s	98 s	203 h 35 70 s of computation	2°

How these tests were made

- **The passages.** The 24 passages of Sailaware's test bench: channels and strong-current passages in Brittany, Mediterranean capes, the English Channel, the Portuguese coast, Mediterranean and Atlantic crossings, the Pacific, and three difficult arrivals from the Balearics (Gulf of Morbihan, Lorient, Étel river). The Île-aux-Moines → Belle-Île passage is run three times: without a mark, then with a mark to leave to port, then to starboard.
- **The boats.** Four polars: a cruiser (Zelenine), a 60-foot offshore racer (Class 60), an IMOCA 60, and the VGR-100 (cruiser).
- **The weather.** Each passage has its own forecast, frozen in a file (GFS, ECMWF IFS, ARPEGE, or the Sailaway simulator weather), with tidal current for the Breton passages.
- **The computation.** The engine of the application's current version, each profile with its default settings (the heading cone, the coast margin and the rest can be adjusted in the application; here they keep their defaults), its world coastline at zoom 12. One computation per passage and per profile, on a MacBook Pro with an Apple M5 chip (10 cores), on mains power, with nothing else running.
- **Good to know**
  - 127 routes out of 130 arrive. The other 3 are the Overview profile's, the quick look, leaving Île-aux-Moines: the way out of the Gulf of Morbihan is too narrow for it. The application says so and suggests Offshore, which gets through, as do Standard, Coastal and Racing.
  - On the control's very detailed coastline, 6 routes touch land by 2 to 56 m along the way (a point, an islet): the engine works on its own coastline, at zoom 12, less detailed. Each case is pointed out on its passage page.
  - 103 routes touch nothing; 18 touch land only in the last leg, at the harbour entrance.
- **The simulated boat.** Each route is sailed again by a boat that follows it leg by leg, on the same weather, re-reading the wind and current every five minutes. At each point of the route, we compare the time announced by the engine with the boat's time.
- **Land.** Each route is laid on a coastline much finer than the engine's (zoom 14, about one metre): we measure the metres sailed over land. The last leg, drawn straight to the arrival point, may cut a quay or a point at the harbour entrance: it is counted apart, as “harbour entrance”.
- **Reading a passage page**
  - **Announced duration**: the duration of the route computed by the engine.
  - **Simulated boat**: the duration of the boat that sails the route again.
  - **Gap at arrival**: simulated boat minus announced duration (+: the boat arrives later).
  - **Largest gap**: the largest difference between the two times, at any point of the route.
  - **Miles sailed**: the length of the route.
  - **Computation**: the time taken to compute the route.
  - **Land**: the metres of the route over land, outside the harbour entrance.
  - On each map, the five routes each have their own colour; the bold row in the table is the fastest route.

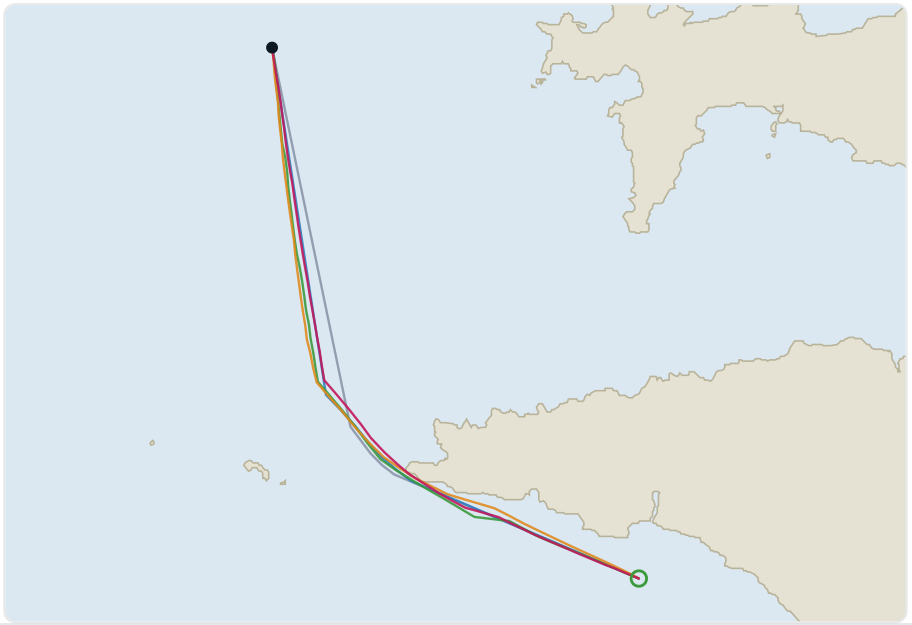

The 26 routes in one table

	PASSAGE	MILES	BOAT	ARRIVED	FASTEST ROUTE	LARGEST GAP	COMPUTATION, FIVE PROFILES	LAND, OUTSIDE HARBOUR

Raz de Sein

Very coastal · 21 miles · Zelenine, cruising · with tidal current

departure 16 October 2026, 06:00 UTC · weather: ARPEGE (Météo-France)

Overview · Offshore · Standard · Coastal · Racing · departure · arrival

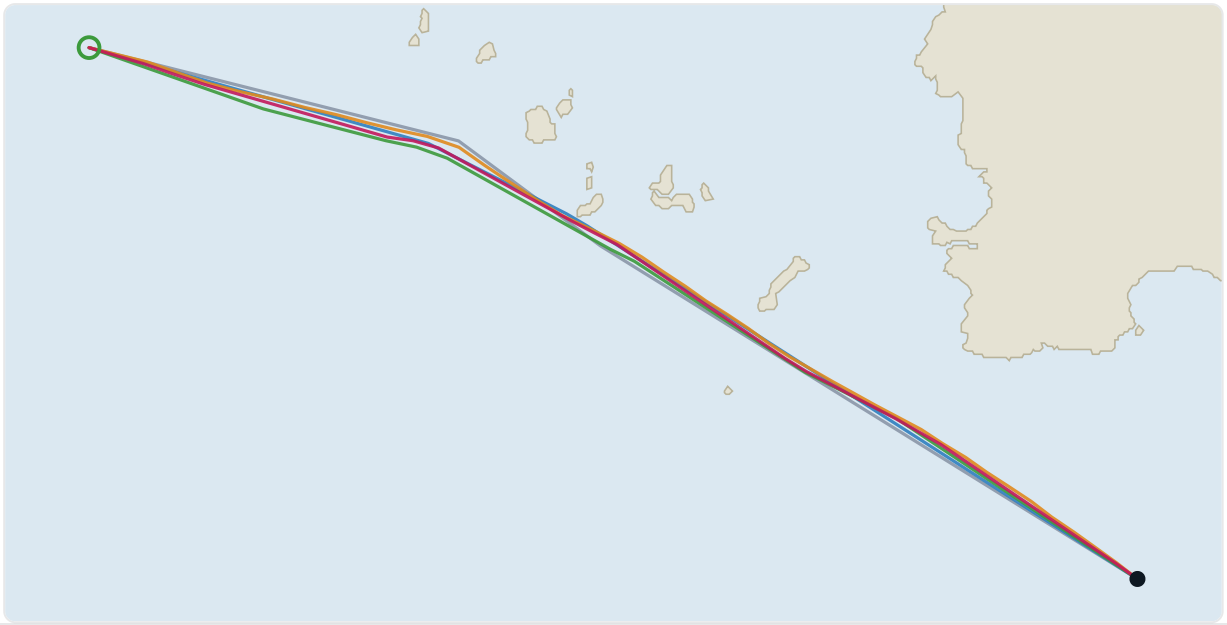

PROFILE	ARRIVAL	ANNOUNCED DURATION	SIMULATED BOAT	GAP AT ARRIVAL	LARGEST GAP	MILES SAILED	COMPUTATION	LAND
Overview	yes	3 h 29	3 h 29	+1 s	1 s	24	0.4 s	none
Offshore	yes	3 h 28	3 h 28	-5 s	5 s	24	0.4 s	none
Standard	yes	3 h 27	3 h 27	< 1 s	< 1 s	24	0.4 s	none
Coastal	yes	3 h 27	3 h 27	+2 s	2 s	24	0.5 s	12 m
Racing	**yes**	**3 h 27**	**3 h 27**	**+4 s**	**4 s**	**24**	**1.3 s**	**none**

- The fastest route is the Racing profile's: 3 h 27, 2 min less than with Overview, for 1.3 s of computation instead of 0.4 s.
- The simulated boat stays within 5 s of the promised time, all along the route, for all 5 routes.
- The Coastal route touches 12 m of land (Pointe du Raz, 48.040° N 4.745° W) on the control's very detailed coastline; the engine works on its own, less detailed coastline.

Racing	**yes**	**44 h 47**	**44 h 47**	**-8 s**	**24 s**	**380**	**13 s**	**none**

- The fastest route is the Racing profile's: 44 h 47, 16 min less than with Overview, for 13 s of computation instead of 1.2 s.
- The simulated boat stays within 24 s of the promised time, all along the route, for all 5 routes.

Marseille → Corfu

Offshore · 700 miles · IMOCA 60

departure 10 October 2026, 12:00 UTC · weather: GFS (NOAA)

PROFILE	ARRIVAL	ANNOUNCED DURATION	SIMULATED BOAT	GAP AT ARRIVAL	LARGEST GAP	MILES SAILED	COMPUTATION	LAND
Overview	yes	65 h 09	65 h 09	< 1 s	1 s	892	1.4 s	none
Offshore	yes	65 h 14	65 h 14	< 1 s	1 s	898	1.5 s	none
Standard	yes	65 h 11	65 h 11	< 1 s	1 s	897	2.6 s	none
Coastal	yes	64 h 50	64 h 50	< 1 s	< 1 s	893	4.7 s	5 m
Racing	**yes**	**64 h 48**	**64 h 48**	**< 1 s**	**3 s**	**894**	**11 s**	**none**

- The fastest route is the Racing profile's: 64 h 48, 21 min less than with Overview, for 11 s of computation instead of 1.4 s.
- The simulated boat stays within 3 s of the promised time, all along the route, for all 5 routes.
- The Coastal route touches 5 m of land (Lavezzi islands, Strait of Bonifacio, 41.356° N 9.262° E) on the control's very detailed coastline; the engine works on its own, less detailed coastline.

Marseille → Malta

Offshore · 610 miles · Zelenine, cruising

departure 10 October 2026, 12:00 UTC · weather: GFS (NOAA)

Overview · Offshore · Standard · Coastal · Racing · departure · arrival

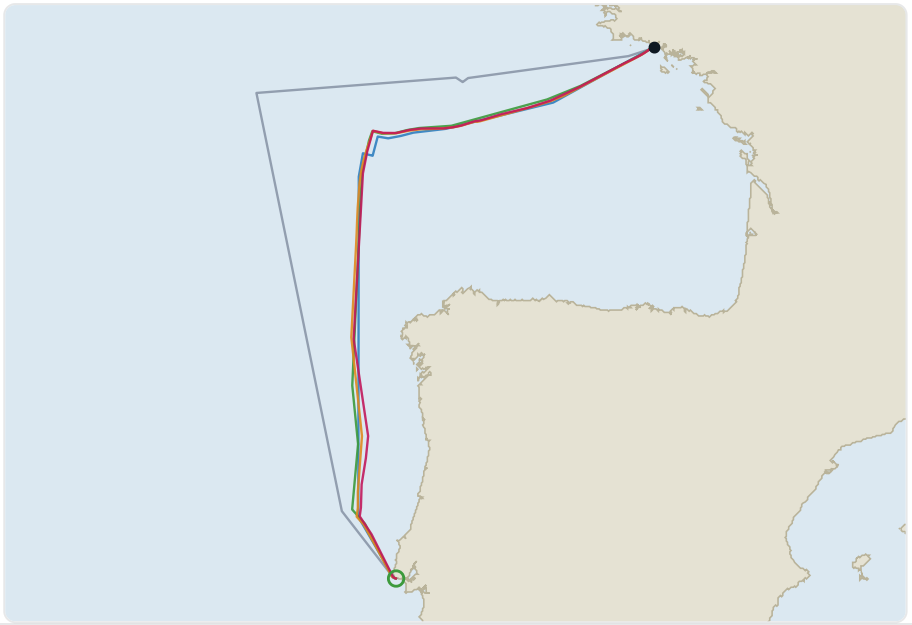

PROFILE	ARRIVAL	ANNOUNCED DURATION	SIMULATED BOAT	GAP AT ARRIVAL	LARGEST GAP	MILES SAILED	COMPUTATION	LAND
Overview	yes	118 h 55	118 h 55	< 1 s	6 s	657	1.7 s	none
Offshore	yes	118 h 50	118 h 50	< 1 s	< 1 s	658	2.4 s	none
Standard	yes	118 h 46	118 h 46	< 1 s	< 1 s	659	4.0 s	none
Coastal	yes	118 h 39	118 h 39	< 1 s	1 s	642	7.6 s	none
Racing	**yes**	**118 h 34**	**118 h 34**	**< 1 s**	**< 1 s**	**641**	**22 s**	**none**

- The fastest route is the Racing profile's: 118 h 34, 20 min less than with Overview, for 22 s of computation instead of 1.7 s.
- The simulated boat stays within 6 s of the promised time, all along the route, for all 5 routes.

Lorient → Lisbon

Offshore · 600 miles · Class 60, fast

departure 10 October 2026, 00:00 UTC · weather: GFS (NOAA)

Overview · Offshore · Standard · Coastal · Racing · departure · arrival

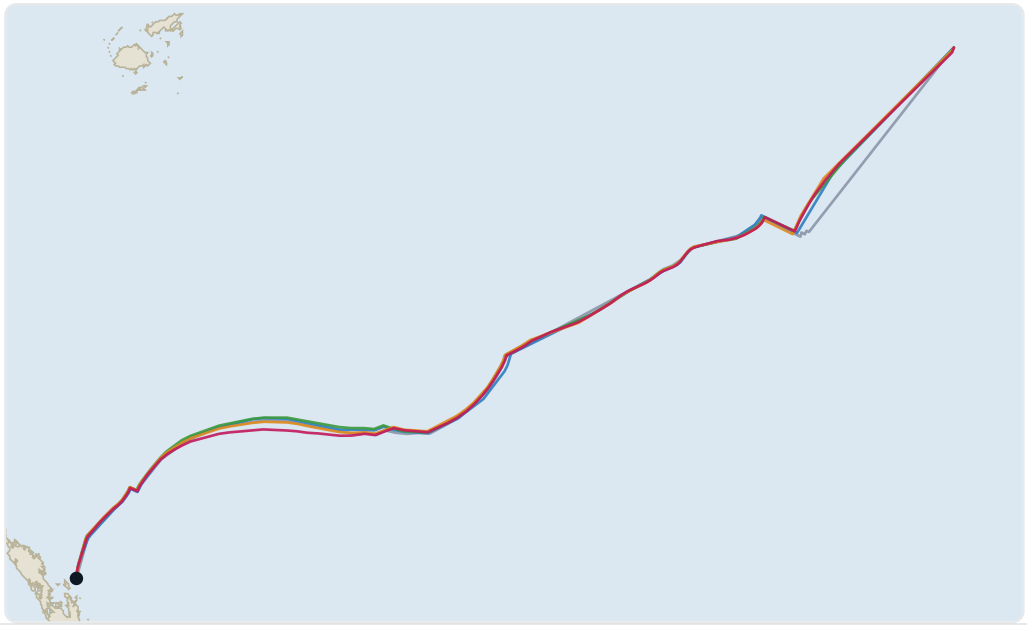

PROFILE	ARRIVAL	ANNOUNCED DURATION	SIMULATED BOAT	GAP AT ARRIVAL	LARGEST GAP	MILES SAILED	COMPUTATION	LAND
Overview	yes	80 h 37	80 h 37	< 1 s	4 s	911	1.4 s	none

Racing	**yes**	**194 h 46**	**194 h 46**	**< 1 s**	**1 s**	**2,341**	**91 s**	**none**

- The fastest route is the Racing profile's: 194 h 46, 2 h 35 less than with Overview, for 91 s of computation instead of 5.4 s.
- The simulated boat stays within 4 s of the promised time, all along the route, for all 5 routes.

Canaries → Antigua

Bluewater · 2,640 miles · Class 60, fast

departure 10 October 2026, 00:00 UTC · weather: GFS (NOAA)

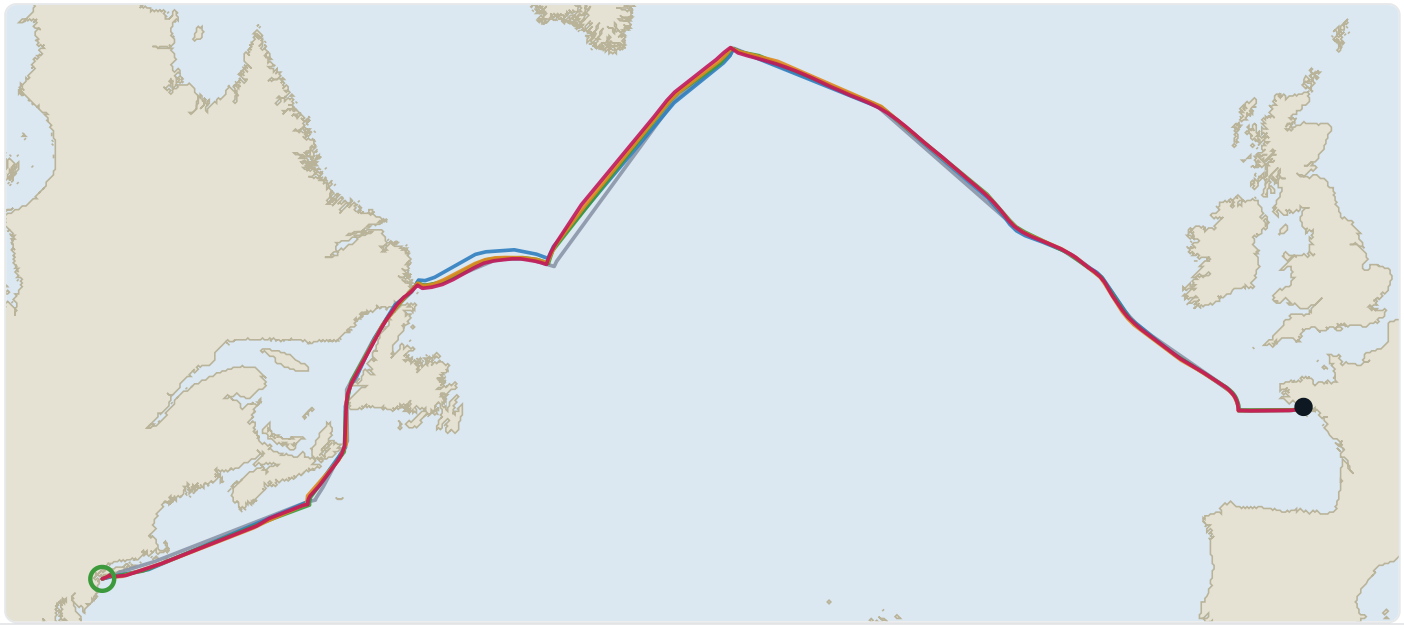

PROFILE	ARRIVAL	ANNOUNCED DURATION	SIMULATED BOAT	GAP AT ARRIVAL	LARGEST GAP	MILES SAILED	COMPUTATION	LAND
Overview	yes	239 h 19	239 h 19	+2 s	3 s	3,444	7.0 s	none harbour entrance: 4 m
Offshore	yes	238 h 20	238 h 20	< 1 s	3 s	3,454	9.5 s	none harbour entrance: 3 m
Standard	yes	237 h 57	237 h 57	< 1 s	2 s	3,447	15 s	none harbour entrance: 3 m
Coastal	yes	237 h 46	237 h 46	< 1 s	< 1 s	3,453	29 s	none harbour entrance: 3 m
Racing	**yes**	**237 h 32**	**237 h 32**	**< 1 s**	**< 1 s**	**3,454**	**98 s**	**none** **harbour entrance: 402 m**

- The fastest route is the Racing profile's: 237 h 32, 1 h 47 less than with Overview, for 98 s of computation instead of 7.0 s.
- The simulated boat stays within 3 s of the promised time, all along the route, for all 5 routes.
- Harbour entrance: the last leg, drawn straight to the arrival point, crosses 402 m of land at most (5 routes); it is not counted as an error.

Lorient → New York

Bluewater · 2,960 miles · Class 60, fast

departure 10 October 2026, 00:00 UTC · weather: GFS (NOAA)

Overview · Offshore · Standard · Coastal · Racing · departure · arrival

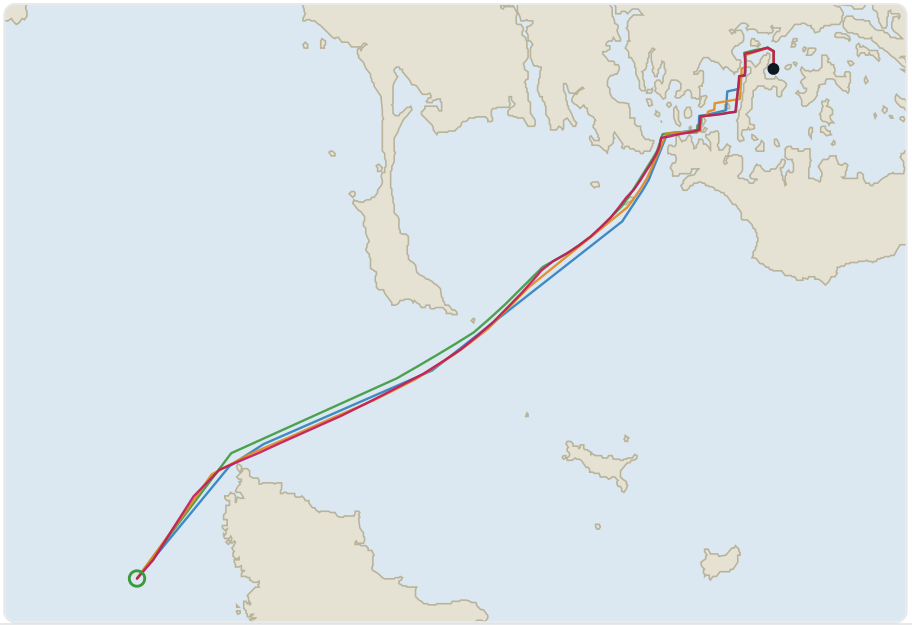

PROFILE	ARRIVAL	ANNOUNCED DURATION	SIMULATED BOAT	GAP AT ARRIVAL	LARGEST GAP	MILES SAILED	COMPUTATION	LAND
Overview	yes	206 h 03	206 h 03	< 1 s	34 s	3,475	5.5 s	none
Offshore	yes	204 h 34	204 h 34	< 1 s	14 s	3,460	7.4 s	none
Standard	yes	203 h 57	203 h 57	+2 s	11 s	3,468	12 s	none
Coastal	yes	203 h 43	203 h 43	< 1 s	4 s	3,468	22 s	56 m
Racing	**yes**	**203 h 35**	**203 h 35**	**< 1 s**	**2 s**	**3,468**	**70 s**	**none**

- The fastest route is the Racing profile's: 203 h 35, 2 h 27 less than with Overview, for 70 s of computation instead of 5.5 s.
- The simulated boat stays within 34 s of the promised time, all along the route, for all 5 routes.
- The Coastal route touches 56 m of land (Labrador coast, Strait of Belle Isle, 52.065° N 55.694° W) on the control's very detailed coastline; the engine works on its own, less detailed coastline.

Île-aux-Moines → Belle-Île

Very coastal · 29 miles · Zelenine, cruising · with tidal current

departure 16 October 2026, 06:00 UTC · weather: ARPEGE (Météo-France)

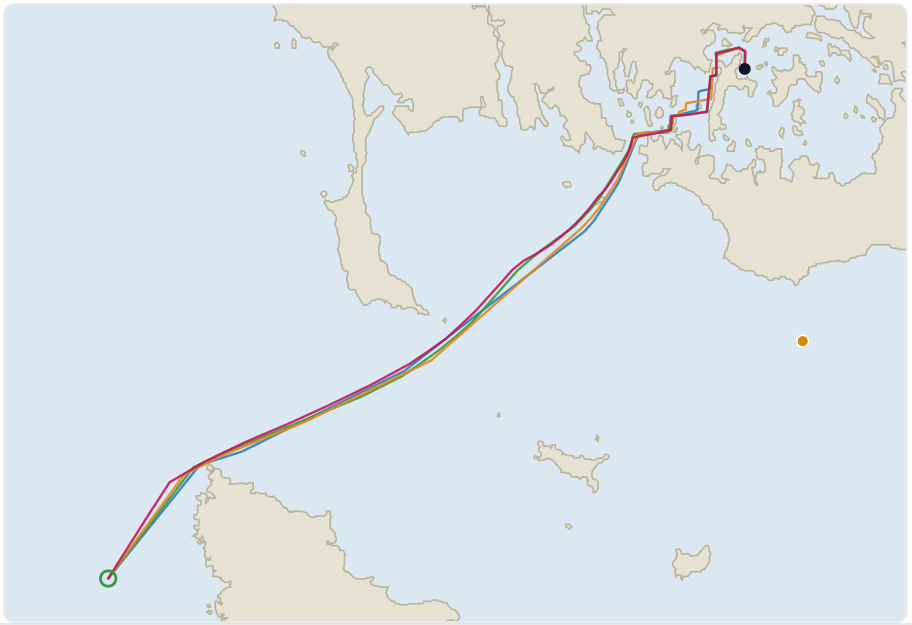

PROFILE	ARRIVAL	ANNOUNCED DURATION	SIMULATED BOAT	GAP AT ARRIVAL	LARGEST GAP	MILES SAILED	COMPUTATION	LAND
Overview	*no route: this profile, the least fine, does not get through the narrow passage out of the gulf; the application says so and suggests the Offshore profile.*							
Offshore	yes	5 h 15	5 h 15	-4 s	5 s	28	0.5 s	none
Standard	yes	5 h 14	5 h 14	-9 s	11 s	29	0.5 s	none
Coastal	yes	5 h 14	5 h 14	-8 s	8 s	28	0.6 s	none
Racing	**yes**	**5 h 13**	**5 h 12**	**-18 s**	**18 s**	**28**	**1.0 s**	**none**

- The fastest route is the Racing profile's: 5 h 13.
- The simulated boat stays within 18 s of the promised time, all along the route, for all 4 routes.

Île-aux-Moines → Belle-Île, mark to port

Very coastal · 29 miles · Zelenine, cruising · with tidal current · mark to leave to port (0.3 mile clearance)

departure 16 October 2026, 06:00 UTC · weather: ARPEGE (Météo-France)

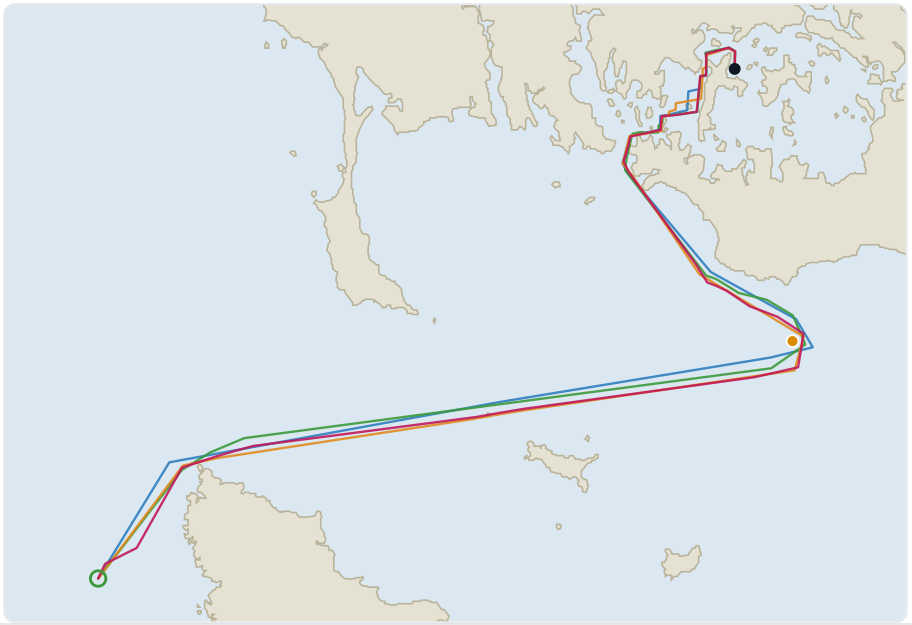

PROFILE	ARRIVAL	ANNOUNCED DURATION	SIMULATED BOAT	GAP AT ARRIVAL	LARGEST GAP	MILES SAILED	COMPUTATION	LAND
Overview	*no route: this profile, the least fine, does not get through the narrow passage out of the gulf; the application says so and suggests the Offshore profile.*							
Offshore	yes	5 h 15	5 h 15	-4 s	5 s	28	0.5 s	none
Standard	yes	5 h 14	5 h 14	-11 s	11 s	29	0.5 s	none
Coastal	yes	5 h 15	5 h 14	-6 s	7 s	28	0.7 s	none
Racing	**yes**	**5 h 13**	**5 h 12**	**-14 s**	**14 s**	**28**	**1.3 s**	**none**

- The fastest route is the Racing profile's: 5 h 13.
- The simulated boat stays within 14 s of the promised time, all along the route, for all 4 routes.

Île-aux-Moines → Belle-Île, mark to starboard

Very coastal · 29 miles · Zelenine, cruising · with tidal current · mark to leave to starboard (0.3 mile clearance)

departure 16 October 2026, 06:00 UTC · weather: ARPEGE (Météo-France)

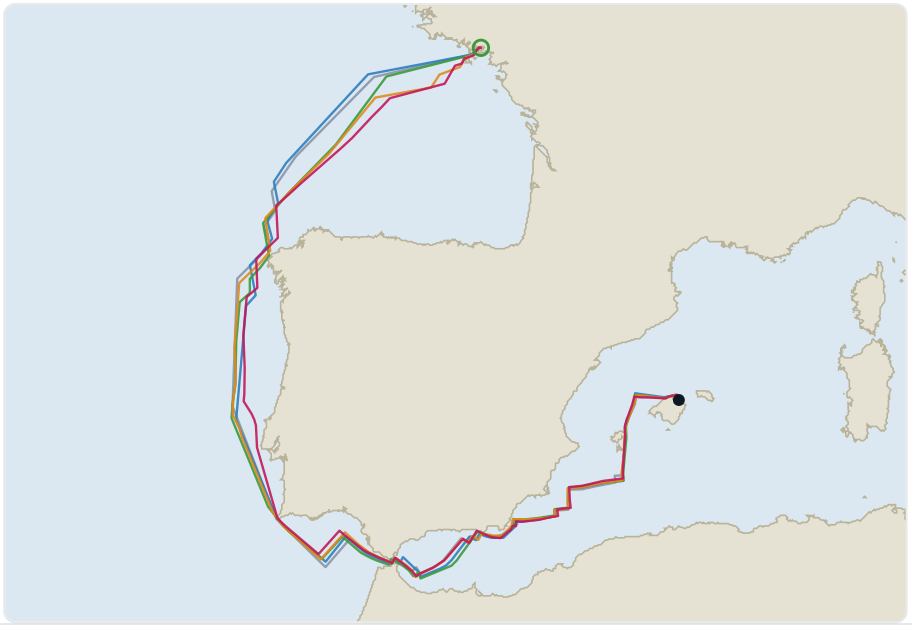

PROFILE	ARRIVAL	ANNOUNCED DURATION	SIMULATED BOAT	GAP AT ARRIVAL	LARGEST GAP	MILES SAILED	COMPUTATION	LAND
Overview	*no route: this profile, the least fine, does not get through the narrow passage out of the gulf; the application says so and suggests the Offshore profile.*							
Offshore	yes	7 h 08	7 h 08	-7 s	7 s	40	0.5 s	none
Standard	yes	7 h 03	7 h 03	-8 s	9 s	40	0.6 s	none
Coastal	yes	7 h 05	7 h 05	-4 s	4 s	40	0.7 s	none
Racing	**yes**	**7 h 01**	**7 h 01**	**-12 s**	**12 s**	**40**	**1.4 s**	**16 m**

- The fastest route is the Racing profile's: 7 h 01.
- The simulated boat stays within 12 s of the promised time, all along the route, for all 4 routes.
- The Racing route touches 16 m of land (between Quiberon and Houat, 47.416° N 3.025° W) on the control's very detailed coastline; the engine works on its own, less detailed coastline.

Balearics → Gulf of Morbihan

Bluewater · 1,680 miles · VGR-100, cruising

departure 9 November 2026, 19:00 UTC · weather: Sailaway simulator weather

Overview · Offshore · Standard · Coastal · Racing · departure · arrival

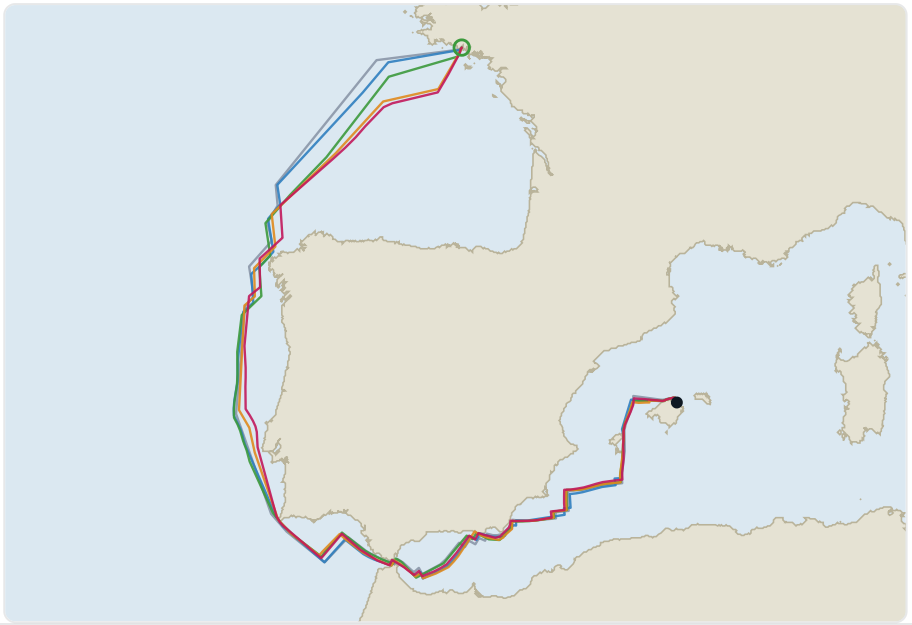

PROFILE	ARRIVAL	ANNOUNCED DURATION	SIMULATED BOAT	GAP AT ARRIVAL	LARGEST GAP	MILES SAILED	COMPUTATION	LAND
Overview	yes *	151 h 55	151 h 55	< 1 s	4 s	1,699	8.1 s	none harbour entrance: 43 m
Offshore	yes *	152 h 09	152 h 09	+12 s	20 s	1,703	9.6 s	none
Standard	yes *	151 h 18	151 h 18	+4 s	8 s	1,680	15 s	none harbour entrance: 44 m
Coastal	yes *	151 h 07	151 h 07	+12 s	23 s	1,683	26 s	none
Racing	**yes ***	**149 h 27**	**149 h 27**	**+4 s**	**11 s**	**1,662**	**95 s**	**5 m**

- The fastest route is the Racing profile's: 149 h 27, 2 h 28 less than with Overview, for 95 s of computation instead of 8.1 s.
- The simulated boat stays within 23 s of the promised time, all along the route, for all 5 routes.
- The Racing route touches 5 m of land (Cap de Formentor, Majorca, 39.963° N 3.213° E) on the control's very detailed coastline; the engine works on its own, less detailed coastline.
- Harbour entrance: the last leg, drawn straight to the arrival point, crosses 44 m of land at most (2 routes); it is not counted as an error.
- * The routes arrive through the narrow-passage fallback: when the ordinary computation stalls before a narrow entrance, the engine resumes it with a finer step for the end of the passage.

Balearics → Lorient

Bluewater · 1,660 miles · VGR-100, cruising

departure 9 November 2026, 19:00 UTC · weather: Sailaway simulator weather

Overview · Offshore · Standard · Coastal · Racing · departure · arrival

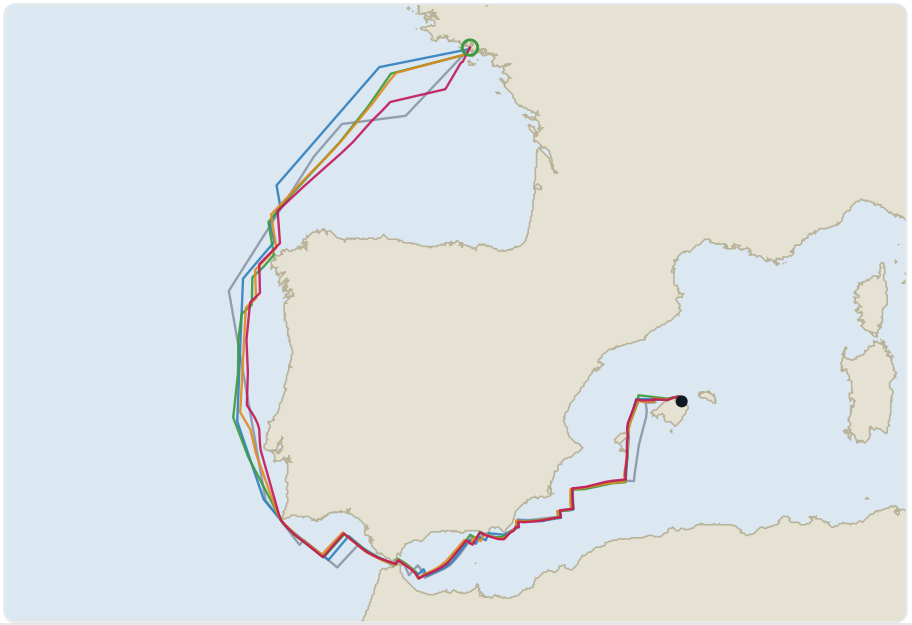

PROFILE	ARRIVAL	ANNOUNCED DURATION	SIMULATED BOAT	GAP AT ARRIVAL	LARGEST GAP	MILES SAILED	COMPUTATION	LAND
Overview	yes	150 h 32	150 h 32	< 1 s	3 s	1,692	3.0 s	none
Offshore	yes	149 h 43	149 h 43	< 1 s	34 s	1,679	3.4 s	none
Standard	yes	149 h 32	149 h 32	+14 s	25 s	1,656	4.7 s	none
Coastal	yes	148 h 57	148 h 58	+21 s	35 s	1,653	7.5 s	none
Racing	**yes**	**148 h 21**	**148 h 21**	**+7 s**	**10 s**	**1,651**	**18 s**	**none**

- The fastest route is the Racing profile's: 148 h 21, 2 h 11 less than with Overview, for 18 s of computation instead of 3.0 s.
- The simulated boat stays within 35 s of the promised time, all along the route, for all 5 routes.

Balearics → Étel river

Bluewater · 1,660 miles · VGR-100, cruising

departure 9 November 2026, 19:00 UTC · weather: Sailaway simulator weather

Overview · Offshore · Standard · Coastal · Racing · departure · arrival

PROFILE	ARRIVAL	ANNOUNCED DURATION	SIMULATED BOAT	GAP AT ARRIVAL	LARGEST GAP	MILES SAILED	COMPUTATION	LAND
Overview	yes	153 h 08	153 h 08	+8 s	15 s	1,683	2.8 s	none harbour entrance: 1,036 m
Offshore	yes	150 h 52	150 h 53	+8 s	21 s	1,680	3.4 s	none harbour entrance: 1,037 m
Standard	yes	150 h 00	150 h 00	+4 s	7 s	1,661	4.7 s	none harbour entrance: 1,049 m
Coastal	yes	149 h 35	149 h 35	+7 s	15 s	1,658	7.2 s	none harbour entrance: 1,044 m
